PROJECT

E-commerce | 2024-Present

- Technologies: React, Node.js, Prisma, MySQL
- The front-end allows users to browse and add products to their shopping cart, make payments, and view product details
- The back-end provides tools for managing users, adding categories, and creating or updating products

MatchingCard | 2023-2024

- Players match English vocabulary cards with corresponding picture cards and learn new words and their meanings after completing the game.
- Adjust the number of cards and table columns for a personalized gameplay experience and choose difficulty levels based on the vocabulary you want to challenge yourself.
- Players can submit their own vocabulary words and pictures to be added to the game.This feature encourages user participation and enhances the game's content variety
- An admin reviews and approves the submissions via a vocabulary management system
- Sync vocabulary and images when connected to the internet.
- Cache data locally, enabling gameplay even without an internet connection.
